Title: Quotes to Scrape

About Dataset

Context:

This dataset contains quotes of famous people which are tagged depending of the quote.

Content:

- There are 10 quotes of first page.

- Name of the author

- Also has some tags relationated with the quote to classify them

Creation date. 10/09/2023

Title: Political ideologies

About Dataset

1. **Context:**

Political ideologies encompass a diverse array of beliefs that dictate how societies and their institutions should operate. These ideologies span the political spectrum, ranging from extreme left to extreme right, and they address fundamental questions related to ethics, economics, and societal principles. Two crucial dimensions classify these ideologies: their envisioned societal purposes and the methods proposed for achieving them. Key figures in the realm of political thought, such as Jean-Jacques Rousseau, Karl Marx, Thomas Hobbes, and Max Weber, have significantly contributed to the development of these ideologies. This notebook section also organizes ideologies into categories, including anarchism, conservatism, environmentalism, feminism, liberalism, nationalism, and religion, offering insights into their core tenets and impacts on political landscapes worldwide.

2. **Content:**

Political Ideologies: These are sets of ideas that define how a society or state should function, covering government type and economic system.

Key Thinkers: Influential figures like Rousseau, Marx, Weber, and Hobbes explored these ideologies and their impact on society.
